

X1 Announces Strategic Product Integration with Relativity

Enterprise e-discovery collection and Early Case Assessment (ECA) solution now provides direct import into Relativity

Pasadena, Calif. – June 21, 2018 – X1, the company that is transforming how endpoints are collected at industry-leading speed, today announced that its X1 Insight and Collection (XIC) solution for Early Case Assessment (ECA), now integrates with [Relativity](#), the industry leading e-discovery platform.

Whether it's litigation, information governance, a government request, or an internal investigation, Relativity provides organizations with a complete set of flexible tools to tackle their unique challenges through every phase of a project. The Relativity platform allows developer partners like X1 to design, build, and integrate applications that extend its functionality.

X1 Insight & Collection, a component of the X1 Distributed Discovery platform, allows enterprises to search across and collect from up to thousands of custodians in hours, with direct upload into Relativity. This revolutionizes the enterprise e-discovery collection and ECA process by enabling a highly targeted and efficient search and collection process, with immediate pre-collection visibility into your data. XIC enhances the e-discovery workflow with integrated culling and deduplication, thereby eliminating the need for expensive and cumbersome electronically stored information (ESI) processing tools.

"X1's tight integration with Relativity is a game-changer as it streamlines the e-discovery workflow by eliminating expensive and cumbersome processing steps and dramatically increasing speed to review," stated John Patzakis, X1 Executive Chairman. "We are excited to feature X1 Insight and Collection in the [Relativity App Hub](#)."

"Collecting enterprise ESI can be one of the most daunting parts of the e-discovery process," said Drew Deitch, senior manager for strategic partnerships at Relativity. "We're excited to bring XIC into the App Hub, where it will offer users another great way to access, search, process, and import enterprise data into Relativity."

X1 has a 7-minute demonstration video of this integration with Relativity available at their website at www.x1.com/relativity_demo.html.

To learn even more about X1 Insight and Collection visit the [Relativity App Hub](#), which includes applications and integrations to extend the platform's functionality.
