

# X1 Social Discovery On-Demand™

*X1 Social Discovery™*, the industry's leading software to capture social media and website data in a forensically sound manner, is now available as an on-demand offering directly from X1.

The **X1 Social Discovery On-Demand** offering brings all of the powerful capabilities of *X1 Social Discovery* directly to corporations, governments, law firms, and service providers quickly and effectively, without the need for software installation, hardware or training. Customers can rely on the X1 team to perform the required captures and provide essential data for further analysis. X1 can immediately start the collection process on popular social media sites and websites and deliver to customers the collection output that contains supporting metadata and linked content. Choose from a wide variety of deliverable formats including PDF, Concordance load file, CSV, and HTML. Experience the benefits of the industry-leading *X1 Social Discovery* solution tailored to your specific case requirements.

## **X1 Social Discovery On-Demand**

- Start right away. Immediate data collection provided by X1
- Scalable solution, no software installation or training required
- No IT costs
- Secure infrastructure
- Fast, industry-leading solution

**“Litigants who understand social media—and its benefits and limitations— can immeasurably help their clients resolve disputes. But if not properly researched, preserved, and authenticated, the best social media evidence is worthless.... it is inevitable that the social media accounts of at least one person involved in a dispute will have potentially relevant and discoverable information.”**

### **Florida Law Journal**

## About X1:

X1 creates exceptional solutions for people and organizations that need to find information whether on individual desktops, company networks or social media at the fastest speeds in the industry. Powered by patented and award winning technology, X1 supports more than 600 enterprise customers and more than 600,000 active commercial and government users.
