X1 Social Discovery

Social Media and Web-Based Data Collection

X1 Social Discovery ™ is the industry-leading solution for law firms, legal consultants, and law enforcement who need to collect and search data from social media platforms and the web.

Unique in the Industry

X1 Social Discovery offers a truly unique approach to social media and web-based data collection. X1 Social Discovery is the only eDiscovery solution today to provide post-level automated parsing of Facebook data in the new Facebook format and now post-level automated parsing for Instagram! Social Discovery is also the only solution available to enable automated item-level collection of Twitter, Tumblr, and YouTube data. X1 Social Discovery allows all collected data to be analyzed in a single interface and supports filtering and instant searchability of content and metadata from social media, websites, and webmail collections.

X1 Social Discovery is designed to easily collect social media content from the leading social media platforms, websites, and email including:

- Facebook
- Twitter
- Web pages & websites
- Tumblr
- Instagram
- YouTube
- IMAP email including, Gmail, Outlook.com, and more

Also unique in the industry, X1 Social Discovery collects social media, web, and webmail metadata in a legally defensible manner, preserves the chain of custody, and has the ability to collect dozens of item-level metadata fields directly from supported social platforms. X1 Social Discovery uses the same court-accepted digital hashing algorithm used by digital forensics and eDiscovery professionals to validate and authenticate their data.

About X1

X1 creates exceptional solutions for people and organizations that need to find information, whether on individual desktops, company networks or social media at the fastest speeds in the industry. Powered by patented and award-winning technology, X1 supports more than 600 enterprise customers and more than 600,000 active commercial and government users.

Key Advantages

- True native file collection of social media items and web pages
- Organize collections from multiple platforms simultaneously, through a case-centric workflow
- Robust and comprehensive metadata capture of unique item-level fields
- Easily collect and immediately review data within a single interface
- Instantly search across all collected items with X1's proprietary "Fast-As-You-Type" technology
- Export to multiple formats including load files for Relativity/RelativityOne
- Post-level collection, filtering and production with X1's patented web page authentication

"X1 Social Discovery – a desktop software for Windows that every litigator should include in their technical belt. A single license of X1 Social Discovery is affordable and necessary for the smallest domestic issue all the way up to the largest civil litigation matter.

Our Customers

X1 Social Discovery

Instantly preview content from individual items ingested, including any referenced link

Search against metadata fields and content of referenced links and view highlighted matches instantly while filtering results

Conduct single-page web capture and multiple-page web crawl and review the data alongside the rest of the social media content

Capture Instagram content and all the associated metadata with automated profile scrolling, post parsing and comment expansion

Collect

Data can be automatically collected and indexed directly from top social media platforms, websites, and webmail providers. X1 Social Discovery aggregates data from these multiple sources in real time, in a highly scalable and case-centric manner.
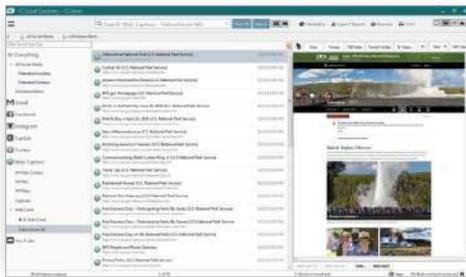

Authenticate

Digital hash values of individual items are calculated upon capture and maintained through export. Automated logging and reports are generated. Key metadata unique to social media content and web pages are captured through deep integration with various social media platforms including, Facebook, Instagram, Twitter and more.

Search

Instantly perform broad, unified searches of collected data across multiple accounts, social media platforms and websites from a single interface. Linked content is automatically indexed and searchable and all data is aggregated for sorting, tagging and export consistent with standard eDiscovery or investigative workflow.

Export

Export data along with metadata and linked content to a wide variety of deliverable formats including Concordance, CSV, PDF, PST, and HTML. Create eDiscovery load files and deliver collected data in a searchable native format to a review platform like Relativity.

With X1 Social Discovery, you have the ability to perform collections independently or on-demand through X1 collection services. To learn more about flexible options and pricing, contact us at **sales@x1.com**.

X1 Social Discovery training and certification is available through Digital Shield, a recognized leader in computer forensics training and accreditation.
