

## **Tackling Productivity Challenges** with X1 Search

M365

A recent McKinsey report highlights that employees spend 1.8 hours every day—9.3 hours per week, on average—searching and gathering information. That's a pretty significant amount of time in a workweek.

> The IDC highlights that the knowledge worker spends about 2.5 hours per day, or roughly 30% of a workday, searching for information.

X1 Search solves the challenge of endless searching for information with an easy-to-use desktop productivity solution that enables you to instantly search and find the exact information you need across all your data sources (Outlook, Teams, OneDrive, Desktop, Gmail, Google Suite), in a single search, saving you hours a day.

## Savings Impact Using X1 Search

work weeks is **\$6,000,000** in freed up productivity!
