

# X1 Search

## Instantly Find Exactly What You're Looking For Across All Your Data Sources...with a Single Search

### Stop Searching and Start Finding with X1 Search!

Do you spend valuable time individually searching through your Microsoft Outlook, OneDrive, SharePoint, Teams, Slack, Google Drive, Gmail, and more, unable to find what you are looking for? It can be frustrating and nearly impossible to find anything. Stop searching and start finding...

With *X1 Search*, you can **instantly search and find the exact information you need** using a single command, across all your data sources, saving you hours every day! Now enabled **with enhanced AI capabilities**, X1 Search allows you to intelligently classify, categorize, and organize data securely within your environment based on your specific workflows and policies. No other solution enables you to immediately search across emails, attachments, documents, local files, and M365 data, including Teams and Slack chats, [in a single search](#). X1 Search supercharges your productivity, helping you immediately find exactly what you need.

Powered by patented *fast-as-you-type* search, X1 Search enables you to **seamlessly search across all of your data sources** including:

- M365 data sources
- Gmail, Outlook Mail, Yahoo
- Archived mail and local emails
- Google Drive, OneDrive, Box
- Teams Chats and Channels, Slack
- Cloud data sources, and more...

...All within a single, simple, unified interface. This easy-to-use desktop application streamlines user workflows for both business and personal use by rapidly searching years of email, attachments, files and more, providing a consolidated view across your data, and producing **more accurate results up to 5x faster** than any search tool you may find on your desktop.

### Key Benefits

#### Unified Search Across All your Data Sources

Instantly search across Microsoft 365, Teams Chats and Channels, Slack, OneDrive, SharePoint, email, files, cloud file shares, Google Drive, and more within a single, simple, unified interface—delivering results up to 5x faster.

#### AI-Powered Organization and Classification Directly Within X1 Search

Automatically organize and tag emails, documents, chats, and more based on content and context to improve search relevance and productivity. Use pre-configured or organization-approved AI models to support your workflows. All AI capabilities remain fully under your control—enabled by you, with no data leaving your environment.

#### Search Microsoft Teams and Google Drive History with Dedicated Connectors

Easily search Teams Chats and Channels—including attachments, emojis, reactions, and more alongside your complete Google Drive history, with built-in post-search actions to open, download, move, or copy files.

#### Immediate Visibility into your Data with an Easy to Navigate Interface

X1's fast-as-you-type search, hit-highlighting, and indexing across 50+ metadata fields enable precise filtering, with full fidelity preview of attachments, files, chats, and more and built-in post-search actions—all within an easy-to-use interface.

#### High Performance Gmail and Outlook Search

Index, search and find information in your Gmail 3x faster with our API-based Gmail connector. Search across all your Outlook email, attachments, Outlook calendar, and contacts list via X1's deep Outlook integration.

#### Rapid Search Across Archived Email

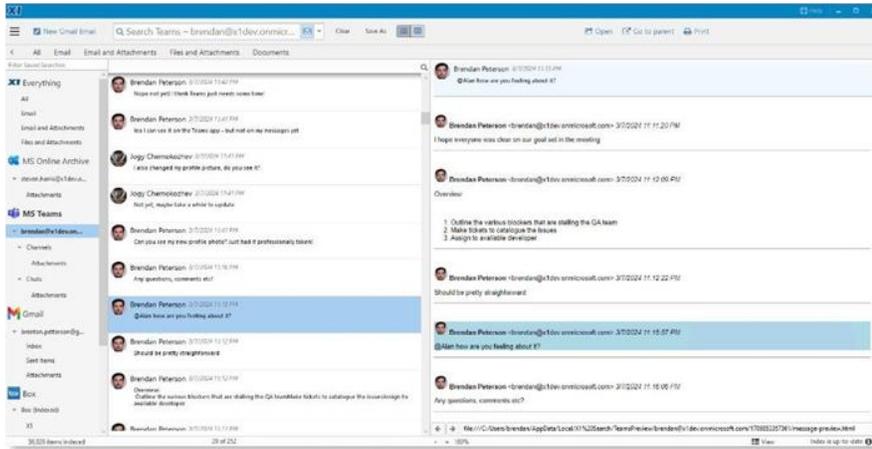

Quickly index years' worth of archived Microsoft 365 Outlook email in half the time!
